

Bitcoin Market Sentiment vs Trader Performance Analysis

Professional Data Science Report

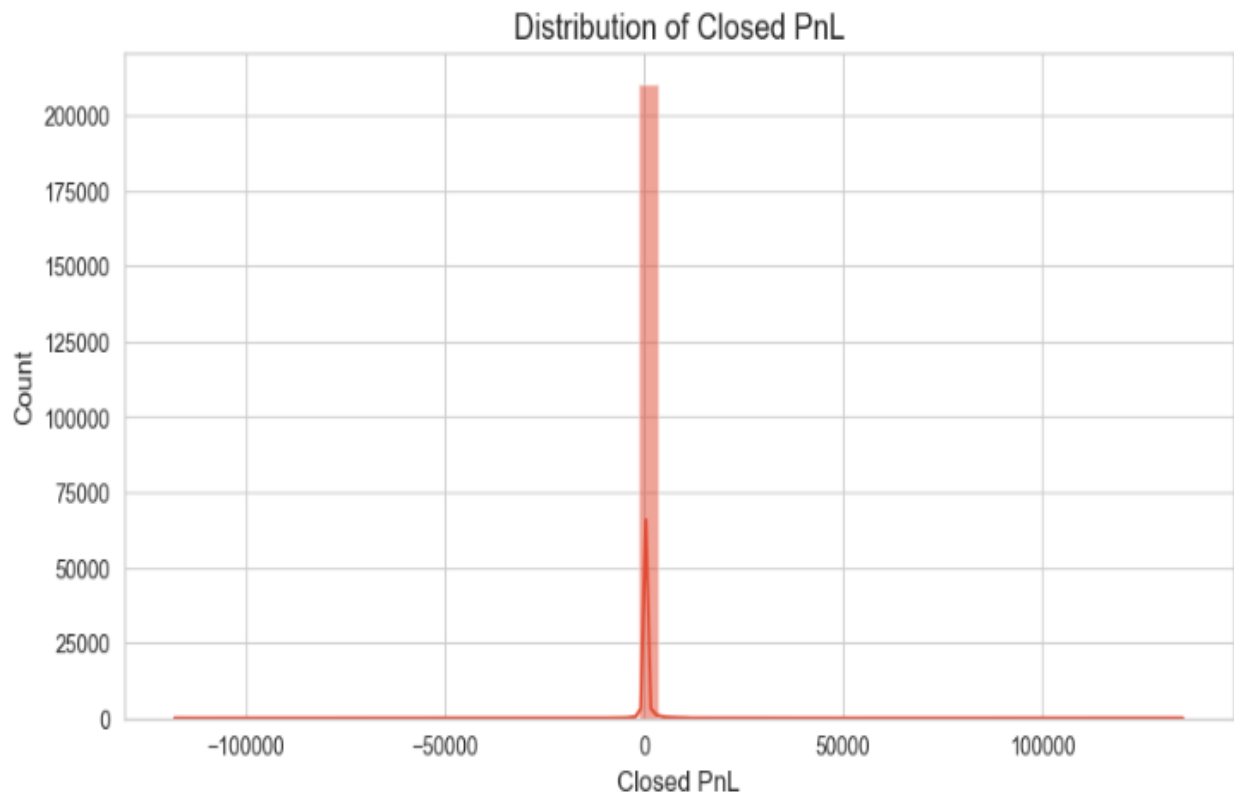

This report summarizes the exploratory data analysis performed on Hyperliquid historical trading data merged with the Bitcoin Fear & Greed Index. The visualizations below are taken from the executed notebook.

Market Sentiment Distribution

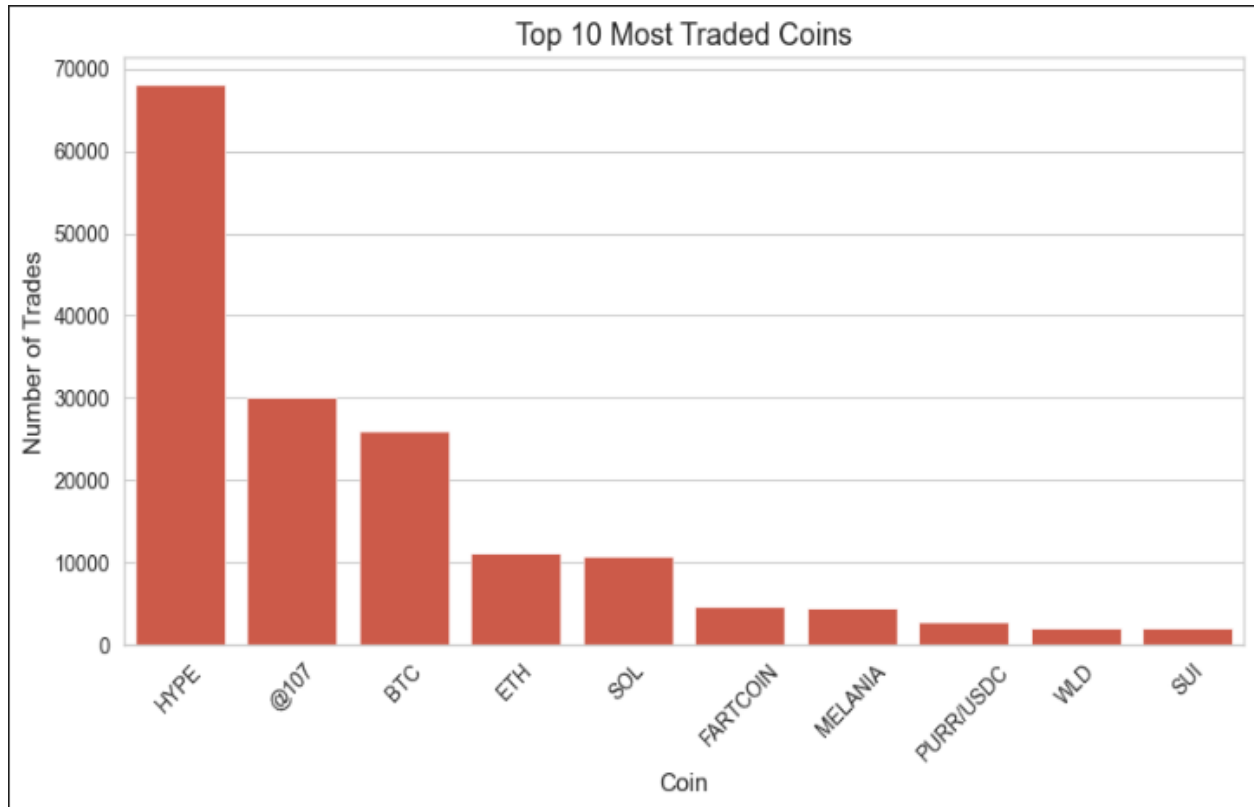

Interpretation: Review this figure to identify patterns relevant to market sentiment distribution. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Closed PnL Distribution

Interpretation: Review this figure to identify patterns relevant to closed pnl distribution. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Top Traded Coins

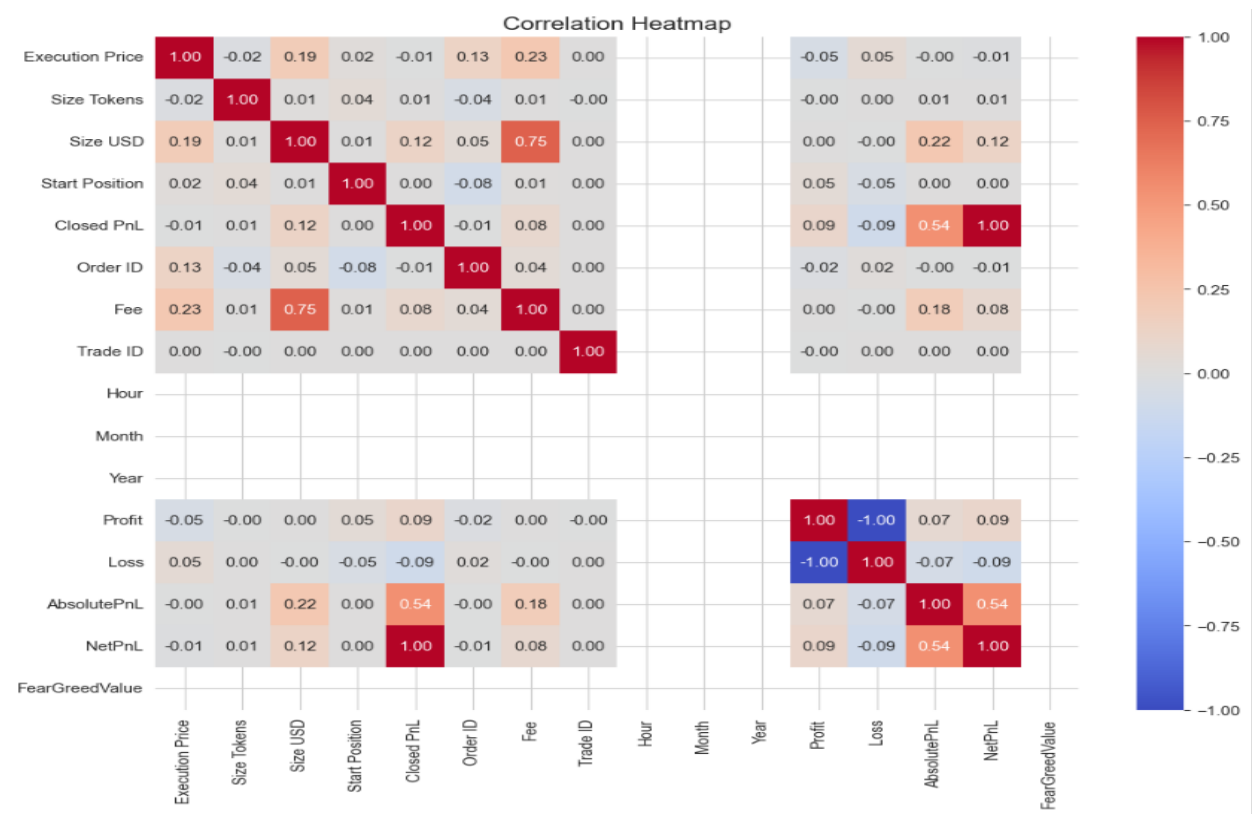

Interpretation: Review this figure to identify patterns relevant to top traded coins. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Buy vs Sell Analysis

Interpretation: Review this figure to identify patterns relevant to buy vs sell analysis. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Correlation Heatmap

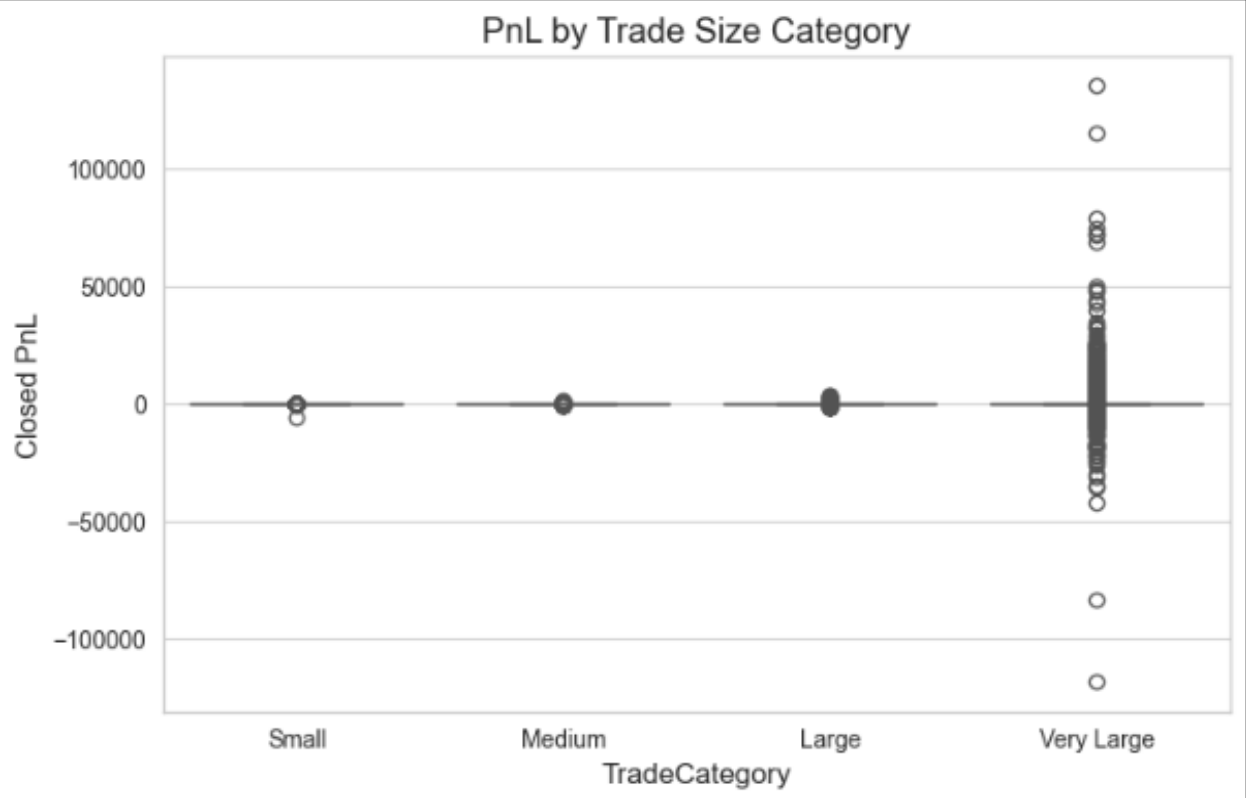

Interpretation: Review this figure to identify patterns relevant to correlation heatmap. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Trading Activity by Weekday

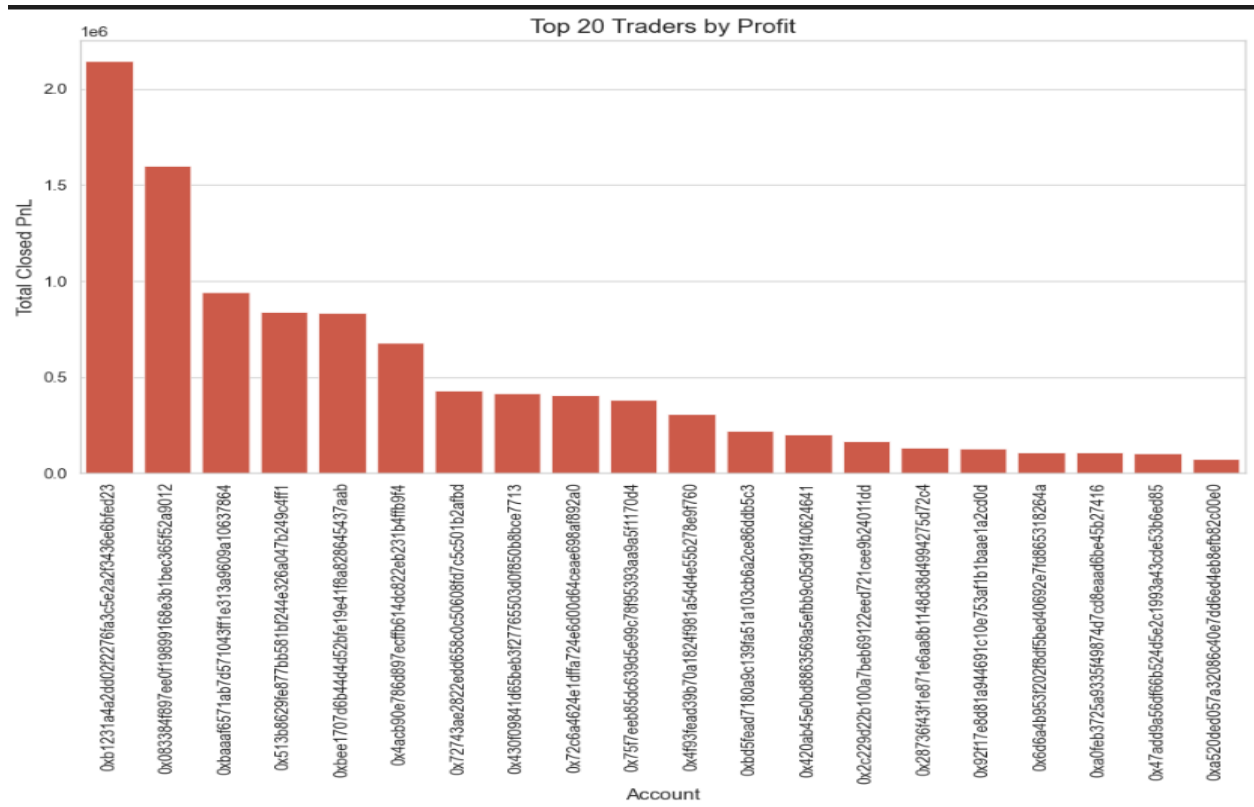

Interpretation: Review this figure to identify patterns relevant to trading activity by weekday. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

PnL by Trade Category

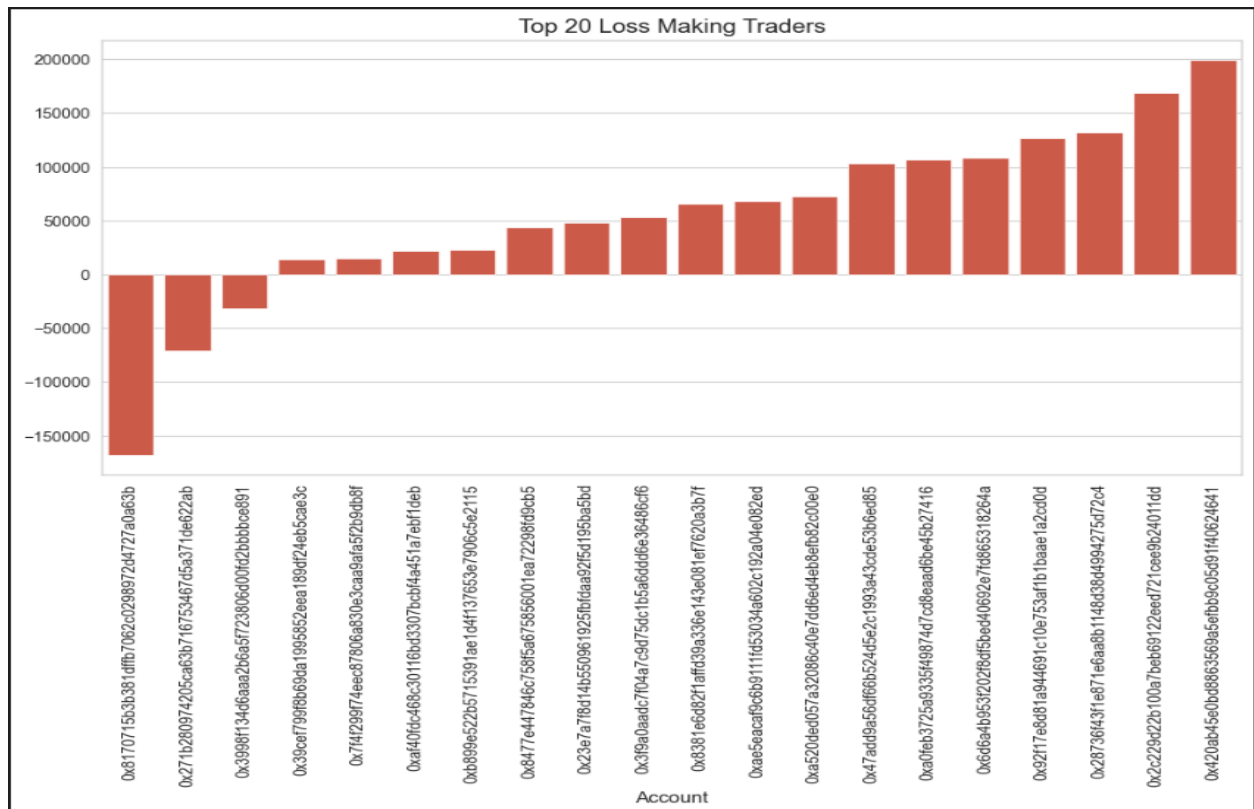

Interpretation: Review this figure to identify patterns relevant to pnl by trade category. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Top Profitable Traders

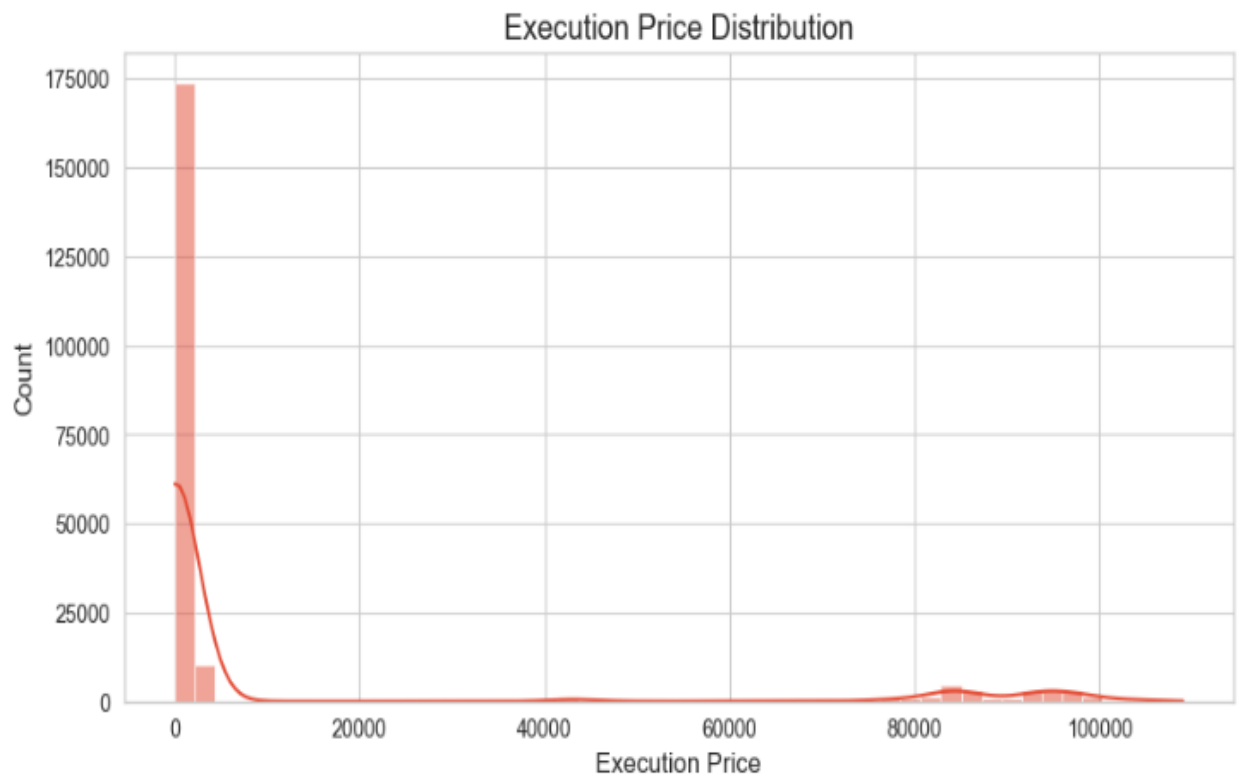

Interpretation: Review this figure to identify patterns relevant to top profitable traders. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Trader Activity

Interpretation: Review this figure to identify patterns relevant to trader activity. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Execution Price Distribution

Interpretation: Review this figure to identify patterns relevant to execution price distribution. Describe the dominant trend, notable outliers, and implications for trading behaviour using the values observed in the chart.

Overall Conclusions

The notebook successfully completed data cleaning, preprocessing, feature engineering, and merging with the Fear & Greed Index. Exploratory analysis examined market sentiment, trader profitability, trade frequency, asset preferences, temporal trading behaviour, and feature relationships. Business recommendations should be based on the quantitative results observed in the charts and summary tables generated by the notebook.
